

Net-O2 demonstrates Carrier Ethernet interoperability tests

Description

New York - Nov 03, 2009 -- Net-O2 Technologies Participated In The Ethernet Expo 2009, Held By Light Reading At The Hilton New York.

Net-O2 Technologies Demonstrated Its Attest Carrier Ethernet Oam Test Solutions For Network Equipment Manufacturers And Network Service Providers By Showing Interoperability And Functionality Tests Covering Cfm And Link-Oam.

The Attest Solution Gives Service Providers The Ability For Quick Determination Of Potential Issues In A Typical Multi-Vendor Network. The Demonstration During The Show Consisted Of Interoperability Testing Between Adva Fsp 150Cc-825 And Omnitron Iconverter Gm3, As Well As Functional Testing Of These Equipments.

Attest Test Solutions For Carrier Ethernet Include:

Attest-Mef Certification Test Suites,
Attest-Cts Conformance Test Suites, And
Attest-Xp Functional Test Suites.

Net-O2 Technologies Attest Automated Test Suites Have Been Licensed By More Than 50 Network Equipment Manufacturers Globally.
