IT Monitoring Solutions for Retail Industries

It Monitoring Solutions For Retail Industries

Retail Companies Have Been Aggressively Pursuing Digital Transformation Adopting New Technologies Such As Data Analytics, Cloud And Real-Time Multimedia Communications. In The Post-Covid Scenario, Many Retailers Have Realized That Customer Expectations Are Limitless, As They Look Forward To Shopping Experiences Both As Online And Brick-And-Mortar Formats. They Need To Ensure The Health And Performance Of Their It Infrastructure To Ensure Customers, Warehousing And Supply Chains Which Are Geographically Dispersed And Remote Are All Well Integrated.

It Teams Need To Get Sufficient Visibility And Telemetry To Ensure That Their Infrastructure And Applications Are Available And Performing Well To The Satisfaction Of Their Users, Partners And Customers.

Top Challenges Faced By Retail Companies

Effectiveness Of Current It Infrastructure

Next Generation Applications Increasingly Demand More Computing, Memory And Storage Along With Better Connectivity.

Availability Of Time Critical Applications

Connectivity To Distributed Locations For Time Critical Applications Need To Be Closely Monitored.

Increasing Capacity And Demand

Ineffective Tracking Of Capacity Utilization And Planning For Demand Could Result In Breakdowns And Poor Performance.

Support For Remote And Dispersed Sites

Enabling Consistent Digital Experience For Collaboration Regardless Of Location, Device Type, Connectivity Etc.

Increased Threats From Remote Workers Devices

IT Resources Without Latest Security Patches Access From Less Secure Environments Can Prove Risky.

Limitations Of Existing Tools

Multiple Vendor Specific Monitoring Systems And Legacy Tools Not Sufficiently Upto The Task.

Veryx Cloudmon Itim And Ntm Enables Retail Companies To Overcome Challenges Related To It Infrastructure And Network Performance:

Challenge	Veryx Cloudmon visibility solution
Effectiveness of IT infrastructure	Provides timely intelligent alerts for potential problems

Time critical applications

Supports monitoring at high granularity for critical applications

Capacity and demand

Provides reporting on utilization levels

Remote site support

Supports monitoring of remote devices for quick troubleshooting

Threats from compromised resources

Provides visibility of threats from the network

Limitations of existing toolsets

Consolidates and provides a unified view of servers, networks and end-points

Unified Visualization

Easily Administer It Infrastructure To Resolve Issues.

Deep Visibility

Resolve Network Performance Problems With High Visibility

Affordable, Cloud-Based

Available For Both On-Premise And Cloud In Pay As You Go Model
